

Bruno Cason da Silva

Front-End Developer

Graduated in Systems Analysis and Development from Fatec Franca. Experience in creating responsive interfaces using React, Next.js, and Tailwind CSS, with a focus on usability and efficiency. Skilled in collaborating with multidisciplinary teams and delivering solutions aligned with user needs. Committed to continuous learning and ongoing process improvement.

Experience

Freelance | Full Stack Developer

2022 - Present

SushiTech - Order Management System

- Developed an order management system for Japanese restaurants, with features such as shopping cart and management of products, tables, and orders.

Landing Pages

- Created customized landing pages for different market niches, focusing on responsive design and conversion optimization.

Compass UOL | Front-End Developer

Natura Social Commerce Project

March 2024 - January 2025

- Worked with the client Natura, focusing on improving and resolving issues in the Social Commerce project.
- Main responsibility: optimizing existing systems, solving technical issues, and implementing adjustments to enhance both performance and user experience.
- Collaborated with cross-functional teams to identify, prioritize, and resolve issues, ensuring the delivery of efficient and high-quality systems.
- Worked in alignment with the client's needs, using performance metrics and feedback to implement continuous improvements.
